

Bruno Marie, Ph.D.
Adjunct Professor of Anatomy and Neurobiology
Key Activity Leader, RCMI Translational Neuroscience
Program

Dr. Bruno Marie is an Assistant Professor at the Institute of Neurobiology, University of Puerto Rico Medical Sciences Campus, where he serves as the scientific coordinator of the RCMI Neurogenetics core facility. He is also Adjunct Professor in the department of Anatomy and Neurobiology, MSC, UPR.

Dr Marie received his PhD in Biochemistry from the University of Sussex, UK in 2000. He then completed his post-doctoral training at the Institute of Neurobiology (2000-2002) and at the University of California, San Francisco (2002-2007).

Dr. Marie's research area of interest is synaptic plasticity. Dr. Marie's laboratory uses Drosophila genetics, imaging and electrophysiology to isolate molecules and mechanisms involved in synaptic plasticity.

Dr. Marie's research is currently supported by the National Institutes of Health (NIH) - MBRS- SCORE Grant: 1SC2NS077924.

Research Areas: Synaptic homeostasis, molecular mechanisms
