

Cristina Palacios, Ph.D.
Associate Professor of Nutrition Program
Seed Monies Recipient, RCMI Program

Dr. Cristina Palacios is an Associate Professor and Coordinator of the Nutrition Program in the Human Development Department at the Graduate School of Public Health of the Medical Sciences Campus of the University of Puerto Rico

Dr. Palacios attended Purdue University, where she earned master's, doctoral and postdoctoral degrees in the Department of Foods and Nutrition.

She is currently doing research in the areas of calcium and vitamin D in relation to bone health, cancer and obesity. She is the author of the Chapter "Nutritional Treatment Osteoporosis" in the recently published book entitled Osteoporosis: Etiology, Diagnosis and Treatment, 2009.

Dr. Palacio's research has been supported by institutional matching funds from the NCRR-RCMI Program at the UPR-Medical Sciences Campus.

Research Areas: Vitamin D in relation to bone health, cancer and obesity
